

# BUG BRIGADE

*good bugs*

3

"Good" bugs are shipped in sachets and can produce an average of 1,000 predatory mites over a period of four to six weeks.

4

Bright yellow & blue sticky cards are placed throughout the crops to attract unwanted pests.

2

Ladybugs are one of 12 to 14 types of "good" bugs to eliminate "bad" bugs.

5

Specially trained scouts inspect our plants daily to identify and monitor bug populations.

1

To avoid the use of pesticides "good" bugs are used to eliminate "bad" bugs as part of the Integrated Pest Management (IPM) System.

6

Whitefly is a type of "bad bug"
